

Continuous Business Form Perforating Folding Machine

Continuous Form Perforating Folding Machine is Japanese technology of designed for making different layer of blank continuous form computer paper form.perforating,folding

It is fully automatic model for production,it can make 11",12",13" etc to divide into 2 or 3 size.

Machine is very simple for operation,it is very steady for heavy duty daily production.

Machine pass CE safety standard for entering the Europe makret.

As option, we have different model for make single layer continuous form, and multi-layer continuous computer paper form, 3, 4, 5 layer as per buyer demand, as well as confidential envelop punching and folding.

Main machine structure: unwind roll loading section, perforating section, impressing horizontal line, edge cutting/ impressing vertical line, auto folding section.

By the above section coordination, the machine can fulfill: jumbo reel paper roll edge hole punching, break line punching, folding the paper stack.

To use together with offset press, to make the continuous computer paper, business bill.

Technical data:

Unwind roll paper outer dia: 1000mm

Max paper width: 500mm

Paer core inner dia: 76+-5mm

Finished paper length: 7.5"-17"

Paper weight: 35-150gsm

Hole dia: 4mm(+0.1mm)

Distance of hole: 12.7mm

Speed: 5-130m/min

Power: 1.5kw

Magnetic powder tension system: adjustable
